

Courses for Care Homes

Courses that have been devised and created by Northern Ireland experts – make your training specific to the context and requirements of Northern Ireland.

We set the Standard for Training Excellence

We realise that costs have to be kept under control, and as the mandatory training requirements become more stringent, we have devised solutions to help you. (see the attached sheets for more details)

- **Mandatory Training Package.**

“A training package that combined e-learning and face to face training meant that fewer hours were lost on training, and we could organise the training without worrying about cover for staff. A really successful result for all of us”

- **Branded eLearning Suite**

“We investigated different solutions for our staff mandatory training. We carried out an appraisal of Safe2Care’s elearning solution, using 50 candidates who completed a combined total of over 200 online courses. Our findings were overwhelmingly positive from both candidates and administrators across Northern Ireland.”

- **Train the Trainer Courses**

“Highly practical and very enjoyable, although I was exhausted at the end of it. Helped me take my training to a whole new level.”

Why not contact us now for your free consultation and quotation.

Mandatory Training Package

Candidates: All those who are currently working in a healthcare environment such as nursing homes

Course Content

The solution covers a combination of Face to Face training and online learning:

Online Learning (can be accessed on computers, ipads, tablets and even smart phones).

Candidates complete the following courses online:

- Fire Protection
- Food Hygiene
- Safeguarding Vulnerable Adults
- Infection Control
- Health and Safety for Healthcarers
- Dementia Training (from the SCIE)
- Moving and Handling theory

Face to Face Training in a 3.5 hour session

- Moving and Handling Practical Assessment (1 hour 15 minutes)
- Emergency First Aid Training (2 hours 15 minutes)

Optional Face to Face

- **Fire Safety Training Practical.** A Fire safety course by a Fireman Instructor with a practical session in the use of two different types of fire extinguishers.

The optimum number in a class is 10 with a maximum of 12 in the class. The classes can be carried out at your venue or in our training suite in Belfast City Centre.

Cost of Course: The course costs £550 for up to 12 people per group.

Certification: Successful candidates receive certificates in each subject completed

These courses are part of the mandatory training required by the RQIA.

Branded eLearning Suite

Staff have to find the time to fit training around their busy lives, while the cost of training to the business can be quite high. Historically, the business has had to pay a qualified trainer, fund the cost of a training room, and meet the expense of organizing and fitting training into a candidate's schedule.

In the last 5 years or so, personal eLearning has come of age, as most people have access to reasonable connection speeds as well as owning the necessary hardware to access an online site. Candidates also have an expectancy of accessing services at a time and place that suits their busy lives.

The majority of courses that are required by the RQIA are knowledge based courses that augment the skills that Social Care workers bring to their work. The key to the RQIA requirements is to have **current courses**, that provide continuous professional development for staff, and enculturate staff with **attitudes of excellence** in their approach to their work. We have found that the Blended Learning Solution that we have designed for the healthcare industry has had a very positive impact in the quality of care that our clients provide.

Elearning and Tutor led courses, combined with strong administrative support, are a winning combination in building strong and vibrant teams.

Courses can be rolled out very quickly and efficiently, with **certificates, evaluations and learner's logs**, all being kept in a secure database, accessible by both trainers and administration staff.
